

**ORDINANCE PROHIBITING THE CONNECTION OF SANITARY  
OR WASTE SEWERS TO STORM DRAINAGE SYSTEMS**

BE IT ORDAINED, by the City Council of LeRoy, McLean County, Illinois:

Section 1. It shall be unlawful for any person, firm, corporation, or institution, public or private, to connect or cause to be connected, any drain carrying, or to carry, any toilet, sink, basement, septic tank, cesspool, industrial waste, or any fixture or device discharging polluting substances to any open ditch, drain, or drainage structure installed solely for street or highway drainage purposes in the city of LeRoy, McLean, County, Illinois.

Section 2. This ordinance is intended to and shall be in addition to all other ordinances, State statutes, rules, and regulations concerning pollution and shall not be construed as repealing or rescinding any other ordinance or part of any ordinance unless in direct conflict herewith.

Section 3. Any person, firm, or corporation violating this ordinance shall be fined not less than \_\_\_\_\_ Dollars (\$ \_\_\_\_\_), nor more than \_\_\_\_\_ Dollars (\$ \_\_\_\_\_) for each offense, and a separate offense shall be deemed committed for each and every day during which a violation continues or exists.

## DISTRICT 3 - URBAN TREE REPLACEMENT PROCEDURE

The purpose of the Urban Tree Replacement Policy is to protect and preserve roadside trees along state highways to the fullest extent possible consistent with standards of highway safety. Where trees are in conflict with the proposed construction and must be removed, the district shall pursue opportunities for providing replacement trees.

The state shall remove or cause to be removed any trees on proposed or existing right of way that are deemed, by the state, to be in conflict with the proposed construction. The state shall inform the city of the number of trees removed as determined in the design plan quantity. The city shall replace all trees removed, at a ratio of 1:1, with 2" to 2 1/2" diameter balled and burlapped native stock trees. The tree species shall be determined by the city to conform with their tree planting and/or tree replacement policy. The state will advise the city on plan selection and planting, if requested. The tree replacement shall be documented by a joint field inspection by the city and the state prior to and following planting. The state shall compensate the city \$250 per tree for the cost of furnishing and planting the replacement trees or for causing them to be furnished and planted in accordance with the state's Standard Specifications for Road and Bridge Construction. The reimbursable cost for each newly planted replacement tree is contingent upon the provisions of a related local-state agreement.

The state desires that replacement trees be planted on the street right of way within the limits of the improvement if there is sufficient planting area. If additional planting area is required, the remaining replacement trees shall be planted on other public and/or on private properties adjacent to or near the site of the tree removal. The city shall obtain the necessary agreements with other governmental agencies and/or permissions and easements or from private property owners required to plant replacement trees on other public or private properties.

The city shall provide the state with documentation specifying governmental agencies and/or land owners' consent to plant replacement trees on their property.
